

Rear Tugger Application Chart

Note: not all bikes are listed - we just can't measure all bikes out there. So...

If your bike has two rear seat mounting bolts, one on each side of the seat, get the Style 1.

If you have a KTM with the single under-seat bolt, get the Style 1 unless otherwise listed!

If you see your same model, but a different year, chances are good the style listed will work.

If you get one and it doesn't work, send it to us for a full refund.

If you are wondering about a FRONT Tugger, the Style 2 (Original or Extreme Enduro) works for all bikes.

If you are wondering about "Adjust length" column, it's just for us when we do custom embroidery.

Make	Year	Model	Style	Adjust Tugger length to..., inches	Extra plastic spacers?	Notes
